

# Hot Tubs, Heating Systems, Accessories, Installation & Supply Nationwide

PARK LEISURE SOLUTIONS LTD

## High Quality North American Hot Tubs For The Park Leisure Industry

Park Leisure Solutions are experts in the wet leisure industry and have over twenty years experience supplying, installing and servicing our range of Hot Tubs and innovative Climacube Heating Systems nationwide. Providing prestige North American built Hot Tubs with state of the art renewable energy heating solutions for our Holiday Park customers.

- Full range of premium quality commercial built Hot Tubs
- The very latest eco friendly energy saving heat technology
- Comprehensive product and parts warranty
- Nationwide supply and service
- Chemical supply and training

Designed specifically for Holiday Park customers, our comprehensive range of quality Hot Tubs satisfies all the guidelines in the HSE 282 document and are supplied with comprehensive warranties as standard.

## Industry Innovation

Innovative design, premium product supply and support, industry leading quality guaranteed. Our ethos is always to lead from the front with our product development and the introduction of our latest additions are already proving dividends to customers in time, money and peace of mind.

### NEW 4 Person Hot Tub

The 202-PKS is the latest addition to our Hot Tub range and has been designed and built in response to customers requests for a full body lounge seat, coupled with comfortable open seating to accommodate 4 adults.

### NEW Climacube Heating System

Our new Climacube Heating System will heat your Hot Tub in around 4-5 hours from cold with a consumption of only 1KW per hour with a COP of over 3.5 in minus temperatures – meaning a dramatic reduction in your annual hot tub energy costs.

### NEW Climer Heat Technology Series

The new Climer Heat Technology Series offers a total heat solution for hot tub, hot water and heating of your Holiday Homes or Lodges. Even swimming pools, shower blocks and large volumes of hot water currently running on gas or oil.

### NEW Quick, Easy And Safe Water Treatment Tablet For Your Hot Tubs

Chlorogene T25 offers the Park/Leisure Operator a complete Chlorine Dioxide solution to Biofilm Removal and eradication of pathogens when draining Hot Tubs. On contact the tablet starts working straight away, eradicating harmful pathogens even cleaning in-situ cartridge filters.

### Model 202-PKS

- Dimensions 80" x 80" x 36"
- Water Capacity: 1,108 Litres
- Seating 4 Adults with Lounge Seat
- 24 Two-Tone Stainless Steel Jets
- Two-Tone Air Controls
- Multi-Colour LED Lights

6

### Model 203-PKS

- Dimensions 86" x 86" x 36"
- Water Capacity: 1,288 Litres
- Seating 6 Adults with Lounge Seat
- 31 Two-Tone Stainless Steel Jets
- Two-Tone Air Controls
- Multi-Colour LED Lights

7

### Model 204-PKS

- Dimensions 86" x 86" x 36"
- Water Capacity: 1,400 Litres
- Seating 7 Adults
- 32 Two-Tone Stainless Steel Jets
- Two-Tone Air Controls
- Multi-Colour LED Lights

8

### Model S106-PKS

- Dimensions 94" x 94" x 36"
- Water Capacity: 1,590 Litres
- Seating 8 Adults
- 33 Two-Tone Stainless Steel Jets
- Two-Tone Air Controls
- Multi-Colour LED Lights

# HEATING SYSTEMS

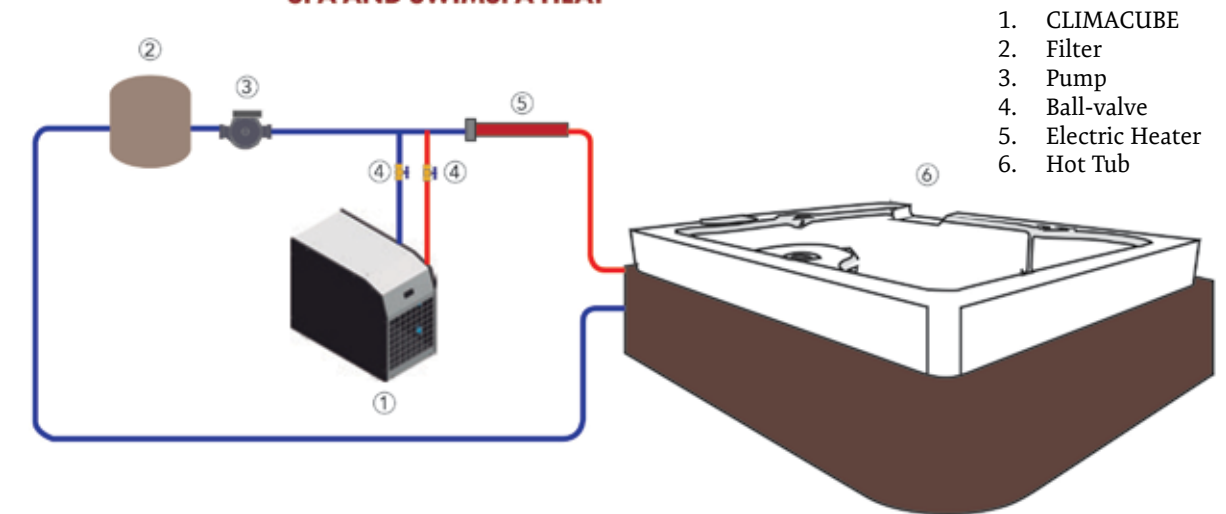

## CLIMACUBE™ HEATING

Climacube is the latest product innovation from Park Leisure Solutions for the Hot Tub industry. The Climacube Heat System offers the very latest energy saving heat technology. Unlike conventional heat systems, Climacube will heat your Hot Tub in around 4-5 hours from cold with a consumption of only 1KW per hour with a COP of over 3.5 in minus temperatures. Dramatically reducing running costs, increasing customer usage, reducing the carbon footprint and enabling customers to use the Hot Tub all year round, at the desired temperature without the concern of cost.

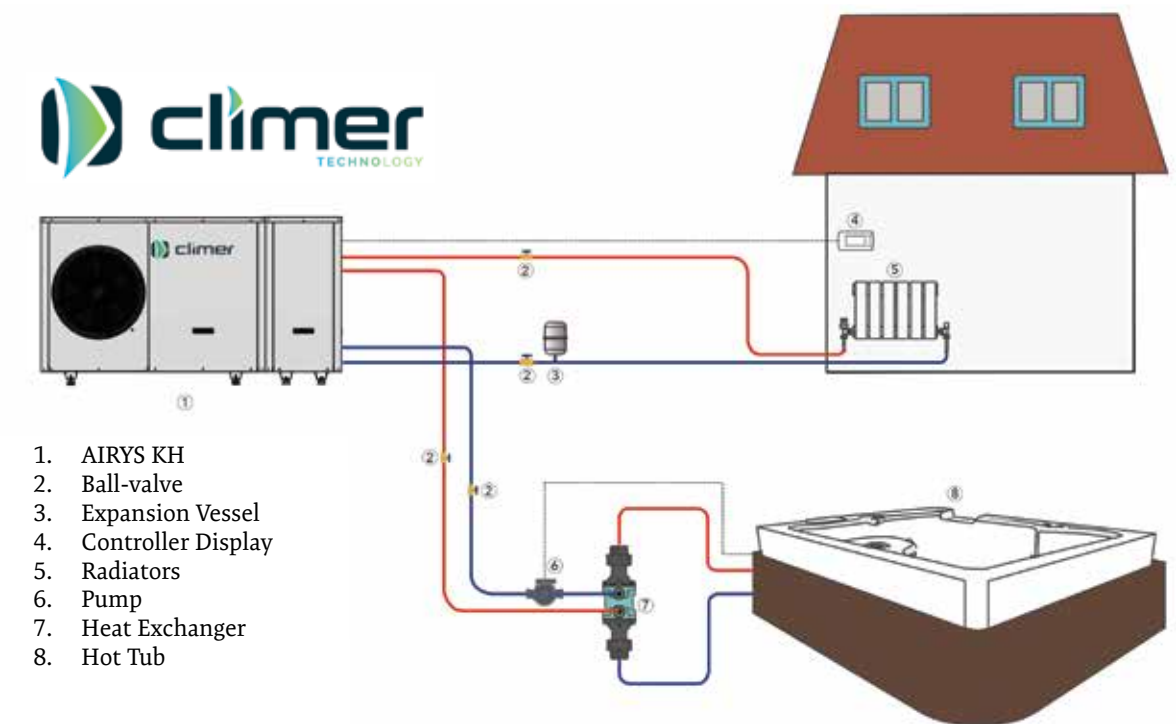

## CLIMER TECHNOLOGY SERIES

The Climer technology series offers total solutions for domestic hot water, swimming pools, shower blocks and large volumes of hot water currently running on gas or oil. We have researched the market and have found many Parks have issues with planning on new developments with gas and infrastructure costs, as well as high monthly bills per lodge and ongoing maintenance and re-filling costs after.

The Climacube Heat System is designed to be integrated into any Hot Tub and will negate the use or expense for any existing electric element. The Hot Tub will work in exactly the same way but by introducing Climacube you will have the benefit of heating the Hot Tub using energy efficient technology. All Hot Tub manufacturers have different build qualities and insulation methods, which actually affect the overall running costs, which means that some Hot Tubs cost more than others to run. However, because Climacube heat technology works 365 days a year, 24 hours a day with a fraction of the power consumption needed to run a conventional 3KW electrical Hot Tub heater, the savings are outstanding.

The New Lodge Heating System has a split system designed to ensure the minimum of space is taken up inside the lodge and to make the system so it can be easily retro-fitted as well as factory fitted. The outdoor heating unit contains all the ancillaries that would normally take up space in the lodge, this is also factory fitted and tested so installation is very simple and quick. There is no maintenance to the units, only standard plumbing that has been designed for ease of access and visual checks.

## ACCESSORIES

### Step Systems and Safety Covers

To enhance and optimise your customers Hot Tub experience, we offer a comprehensive range of accessories.

#### Park Safety Covers

The patented VacuSeal Cover & Lifter vacuum seals the cover to your hot tub. This eliminates costly heat loss, along with helping to prevent water evaporation and changes in your water's chemistry as well as protecting against wind borne debris.

#### Poolspa Smartops

The Pool spa Smartop gives Park owners complete peace of mind that the Hot Tub cover is safe, very strong and durable compared to foam insulation covers from other suppliers. The covers built in lifter negates the lifting and dragging of the foam covers on and off the spas by the customer offering a much better Hot Tub experience.

#### Silverback Steps

Free standing and immensely strong, the Silverback step system is specifically designed for hot tub or deck access.

All of the products are supplied as bare frames which are then finished in whichever material the customer decides to dress them in.

With a 10-year warranty against product failure, park and holiday home owners can be reassured that when a Silverback step system is used as a means of access into their hot tub, they can be confident that the product is supported with load and fatigue test documentation in the event of a claim.

**10 YEAR  
STRUCTURAL  
WARRANTY**

## DECKING SYSTEMS

### Park Spa Deck

Decking systems can provide all means of outside living, from a simple sundeck on which to enjoy those summer days in your hot tub to a sunken 'snug' with a built-in bar. Once installed very little is required to keep it looking in 'tip top' condition for years to come apart from an occasional wash down.

We offer a complete decking service from initial design to delivery and installation nationwide including a wide choice of decking options, balustrades, lighting, steps, gates, skirting and ramps plus bespoke designs if required.

Our Spa Deck System has been specifically designed for our Hot Tub rental fleet customers. The innovative design of the Spa Deck allows easy access to the Hot Tub. Unlike conventional decking the seamless design maintains the integral structure of the deck but negates the need for costly remedial work should you wish to carry out maintenance work or replace the Hot Tub. Saving you both time and money.

## SANITISATION

### A Quick, Easy And Safe Water Treatment Tablet For Your Hot Tubs

A new innovation for 2018, Chlorogene T25 offers the Park/Leisure Operator a complete Chlorine Dioxide solution to Biofilm Removal and eradication of pathogens when draining Hot Tubs, Spas and treating swimming pool balance tank environments; even the "cleanest" environment has met with startling results when Chlorogene T25 is employed.

Using Chlorogene T25 tablets as part of a regular maintenance and water management programme couldn't be more simple. The easy to use tablet format allows you to add the correct dose of Chlorogene T25 to the filter compartment (chemical feeders removed). On contact the tablet starts working straight away, eradicating harmful pathogens, even cleaning insitu cartridge filters.

Chlorogene T25 improves on-site water management, reduces the risk to business and offers a robust solution to biofilm removal; ideal for use prior to draining water.

## CHEMICALS & CHEMICAL TRAINING

### Chemicals and Chemical Training

Park Leisure Solutions work in partnership with Water Treatment Products, a highly respected chemical company offering new chemical innovations to the Holiday Park and Resort sector. In addition to training programmes we offer you full back up on water treatment issues and all biocide products conform to the Biocidal Product Regulation (BPR).

We offer a full range of chemical products for managing Hot Tubs, Spas and Swimming Pool water including everyday sanitisers and algaecides and water balance chemistries, to the new Chlorogene T25 tablet which offers a real solution to biofilm removal, deep cleaning and pathogen removal; please contact us for further details on field trials undertaken with Chlorogene T25, the results will impress!

**Green Clear:** This is a proven easy way to control algae growth on decking, buildings and fencing. We are happy to prove that this product really does work, simply spray and go! Complete elimination of pressure washing, scrubbing and Green Clear is non alkaline, acidic or bleaching. Safe to children and pets as soon as Greenclear has dried. Why not ask for a sample?

**Shower Head Plus:** proven to eliminate legionella bacteria in shower heads, this product also removes scale build up. If legionella is identified within your risk assessment then take action now. Simple to use and fast acting, eliminates a risk often not identified in the Holiday Park and Resort environment.

We are happy to supply Product Data Sheets on any of the products listed.
